SUBMITTAL REQUIREMENTS: SIDING AND WINDOWS

Replacement or Change of Exterior Siding Material

A permit is required for replacement or repairs of exterior siding. The replacement shall comply with California Wildland-Urban Interface Code (CWUI) section 504.5:

Exterior Covering, when the replacement of the wall exceeds 80% of the exterior wall surface to an existing building or structure within any one (1) year period from the date of permit final. The exterior venting in the affected area of work only shall be replaced with exterior venting complying with CWUI section 504.5.

If the weight of the new siding is 5% or greater than the existing siding, Structural Engineering may be required per current CBC ch.34

Requirements for New or Replacement Window

A permit is required for all new or replacement windows and shall comply with the following:

- California Residential Code (CRC) section R325 - natural ventilation requirements.
- Exterior windows, window walls, glazed doors, and glazed openings within exterior doors shall be insulating-glass units with a minimum of one tempered pane, or glass block units, or have a fire resistance rating of not less than 20 minutes, when tested according to ASTM E 2010, or conform to the performance requirements of State Fire Marshal standard 12-7A-2, located in the California Referenced Standards Code, Part 12 and Chapter 35 of the California Building Code.

Bedroom egress windows cannot be decreased in operable width below the minimum egress requirements per CRC section R319:

- Minimum opening area: 5.7 square feet
- Minimum opening height and width: 24" x 20"
- Sill height maximum: 44 inches

An exterior elevation drawing is required for all proposed new windows and windows that are changing in size. Structural Design will be required for all new windows or door openings in existing walls and where replacement windows are larger/smaller than the existing openings.

I have read the above information and have submitted all the required information.
